

Digital Partner Program

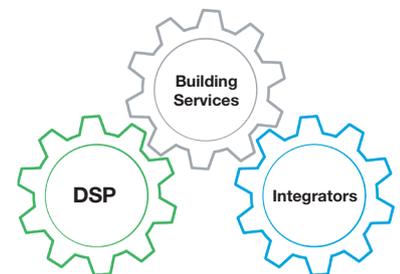

The link between Smart Building Integrators and Digital Solution Providers (DSP) to facilitate innovative building solutions.

The Digital Partner Program brings together a network of best-in-class companies sharing methods and best practices to make buildings more efficient, communicating, and attractive.

- The shared methods ensure an optimal solution that meets project expectations and is delivered within budget, and on time.
 - Collaborative work between agnostic experts in their respective fields, working along side specially trained, Symbioz certified Distech Controls' integrators.
 - Project owners have the freedom to choose their preferred service providers, and participants for the project.
 - An openness that guarantees flexible, and scalable solutions.
- An evolving program that covers the training and values the experience of of the participants.
 - The guarantee of a controlled collaborative environment between all partners.
 - Technological supervision of the program members and specific training for Smart Building projects.
- Complete solutions enabling building owners to enhance the value of their assets.
