

Distech Controls Wins Prestigious Digie Award with Resense Move

[Brossard, Canada, June 25, 2024] - Distech Controls Inc, an innovation leader connecting people with intelligent building solutions, has won the Best AI Tech Innovation – Intelligent Buildings award for its innovative new Resense™ Move at the highly-respected Commercial Real Estate Digital Innovation (Digie) Awards.

The Digie Awards have been running since 1999 and recognize outstanding companies, real estate projects and technologies as well as the people who have gone “above and beyond” to positively impact the industry. The Best AI Tech Innovation – Intelligent Buildings award celebrates the most innovative new idea/technology/product/service for the smart, connected, high performance, intelligent building marketplace. The winners were announced during the IBcon conference on Wednesday, June 20.

Distech Controls was an early adopter of Artificial Intelligence (AI) technology and could see the opportunities it offered to the building controls industry. The company created a team of dedicated experts and, over the years, has built strategic partnerships with leading research institutions and collaborated with universities to shape its AI roadmap. Resense Move is the perfect example of how the team and partners came together to create a product that utilizes AI technology suitable for now and the future.

Charles Pelletier, Product Management Vice President at Distech Controls, comments, “we are thrilled to have won a Digie Award, it’s a fantastic achievement and recognizes the countless hours of dedication, innovation, and passion that have gone into creating this product. It reflects our unwavering commitment to excellence and our relentless pursuit of pushing the boundaries of what’s possible. By leading the way with incorporating AI in our products, we are not just innovating; we are setting new standards for excellence and redefining the future of technology. We are truly grateful for this award as it not only honors the hard work and creativity of everyone involved but also reinforces our mission to deliver smarter, safer and greener buildings.”

Resense Move

Resense Move is a cutting-edge, AI-powered people-counting solution designed to enhance indoor environmental quality, decrease operating costs, and offer real-time data for informed decisions. By monitoring occupancy levels, this sensor can pro-actively adjust airflow, improving air quality while conserving energy. With additional sensing capabilities, Resense Move offers a comprehensive approach to creating healthier, more efficient buildings.

Resense Move is a Distech Controls ECLYPSE Connected device and includes seven different sensors for better indoor environmental quality: people counting, presence detection, light intensity, VOC and noise. As well as dew point or as secondary sensor for temperature and humidity.

Resense Move is a unique solution on the market that includes a variety of sensors with a mission to provide better indoor environmental quality, improve the wellbeing of building occupants and reduce energy consumption.

The AI technology incorporated into Resense Move has benefits for numerous stakeholders. For instance, end users benefit from enhanced wellbeing and proactive ventilation while facility managers can optimize their buildings and deliver proactive maintenance, such as fault finding.

Distech Controls has been collaborating with university researchers who do deep dives in certain areas and the company has utilized those findings to understand what is going to work for our market. It has led to the development of Resense Move so this type of partnership is extremely valuable to Distech Controls and its continuing growth.
