

## Distech Controls Begins Expansion of Global Headquarters in Brossard, Quebec

*Expansion will Support Needs of Rapidly Growing Global Customer Base*

**[Brossard, Quebec, Canada, June 25, 2024]** – Distech Controls, Inc, an innovative leader in intelligent buildings, today announced the first expansion phase of its global headquarters in Brossard, Quebec, creating new job opportunities and investing in the local community.

"We are focused on expanding our addressable market by increasing where we compete and what we can control," says Martin Villeneuve, President of Distech Controls. "In order to support this growth, we are expanding our global headquarter in Brossard by 43 000 sq ft, having completed the expansion of our European headquarters in Brignais, France earlier this year. This increases production and inventory space by 200 percent and our office space by over 125 percent. The expansion positions us well to meet the needs of our growing global customer base."

Distech Controls® building automation controllers, sensors and software are being used throughout the building to drive energy efficiency and support a healthy environment. Our team worked with JLL, QMD and Neuf Architectes to create a collaborative, modern workspace that reflects our mission to make spaces smarter, safer and greener.
